BuiltWorlds Summit Brings Industry Leaders Together for Innovative and Informative Event

BuiltWorlds recently wrapped up its successful Summit 2017 event, and AED was in attendance. Hosted May 3 to May 5 at the Wit Hotel and offsite at notable spots around Chicago's tech scene, the informative event brought together leaders from the construction, engineering, architecture and design, real estate, finance, government, and technology industries for three days of expert keynote speakers, engaging panels, interactive breakout sessions and multi-industry networking opportunities.

"The BuiltWorlds Summit is our premier event that brings high-level executives from different industries together to talk about the future of the built world," said Bryant Donnowitz, BuiltWorlds business partner executive. "We bring everyone from the built environment together to discuss where the industry is going, including new tools, equipment, technologies, materials and software, as well as the innovative projects to which they're all being applied."

More than 170 C-level executives attended the second annual BuiltWorlds Summit – marking a 50 percent increase in attendees compared to the previous year, according to Donnowitz. The event drew forward-thinking industry leaders from all over the city, the country and the world.

"Out of all the C-level executives who attended the summit, 20 percent were from Chicago, 80 percent were from all over the United States, and there were also executives from five different countries," said Donnowitz.

The purpose of the summit: to help industry leaders examine and figure out ways to adapt to things that are redefining the built world, including climate change, disruptive technology, global urbanization and the millennial workforce.

More than 45 speakers delivered presentations during the summit, including executives from DeWalt, the Boston Consulting Group, Engage Civil, AECOM, Suffolk Construction and Invenergy. Additional speakers included representatives from the Chicago Department of Aviation, the City of Chicago, and the Chicago Council on Global Affairs, among others.

On the second day of the summit, Carlo Ratti, director of MIT's SENSEable City Lab and founding partner of Carlo Ratti Associati, delivered a captivating keynote speech on his work with the laboratory, which studies digital technology's power to change the way humans describe, design and occupy cities.

Thornton Tomasetti's Chairman and CEO Tom Scarangelo delivered the final keynote address of BuiltWorlds Summit 2017, which discussed using collaboration to accelerate innovation within various industries.

One of the summit's many notable panels featured a discussion of both market-ready and upcoming new materials and systems being specified by architects and built by contractors. Another panel sought to demystify sensors, the Cloud and the IoT in new AEC tech companies.

Planning for the BuiltWorlds Summit 2018 is well underway, and online registration is open.

Stewart-Amos Sweeper Co. Launches New Website and Online Dealer Marketing Support Program

Stewart-Amos Sweeper Co., a leading manufacturer of highly productive and easy-to-operate chassis-mounted street sweepers, has officially launched its new website. The website, located at www.stewart-amos.com, was designed to provide visitors with quicker and simpler access to key features, benefits and capabilities of the company's street sweepers, including seven mechanical brooms and three regenerative air models.

New to the website are illustrations that allow visitors to get a closer look at the key features and benefits of the various Stewart-Amos street sweepers. The site is also smartphone- and tablet-friendly and allows photos, videos, product literature, and service and support information to be accessed at all times.

Stewart-Amos will also be introducing a new Dealer Marketing Support Program as part of the website, which will allow authorized dealers to quickly browse, request, or customize

marketing materials including advertisements, direct mail, emails, trade show banners and promotional pieces, product literature, and more.

The Dealer Marketing Support Program will also provide the latest technical information and up-to-date specs, data sheets, and warranty information.

To learn more about Stewart-Amos Sweeper Co. or to receive more information about their street sweepers, contact Frank Chulick at frank@stewart-amos.com or call 800-483-2302.

Started in Harrisburg, Pa., in 1938, the Stewart-Amos Equipment Co. is a leading supplier of construction and mining solutions. The Stewart-Amos Sweeper Co. was formed in 2004 and manufactures a full line of chassis-mounted mechanical broom and regenerative air street sweepers.
